

# One Health News(S) UF

## Team Spotlight

Olga Muñoz will be representing the One Health Center of Excellence with a poster titled, "**One Health @ University of Florida**", at the [5th International One Health Congress](#)

Saskatoon, Saskatchewan, Canada | June 22<sup>nd</sup>-25<sup>th</sup>

## Welcome to the OH Team!

We would like to welcome a new addition to our team:

### **Jeanette West**

*Jeanette West is Dr. Capua's new hire for the OPS Administrative Assistant job and will be replacing Josue Romero, who has been a part of the One Health Team since Spring 2017! Jeanette will be brought on to the team in mid-June!*

## New Courses @UF

CLT 3930/ANS10388

A Study of Scientific Vocabulary through Classical Roots

Fall 2018, T (3 - 3:50 PM) R (3-4 : 55 PM)

Taught by:

Dr. Sara Agnelli

## Pop Microscopy Goes Mobile!

Earlier in the Spring semester, we were glad to play a part in hosting **Pop Microscopy: Bridging Art and Science Towards the Future**, in collaboration with University Galleries and the Center for Arts in Medicine.

- BUT NOW-

From June 1<sup>st</sup> until the end of 2018, [Pop Microscopy. Bridging Art and Science towards the Future](#) will become a traveling exhibit here at the University of Florida. Faculty and students are invited to explore the intrinsic beauty of nature all around campus. Through beautiful images of cells, molecules, organs and tissues, the exhibition will bring art and science together to uncover Mother Nature's deepest and most beautiful secrets.

You may find more info about it here:

[www.epi.ufl.edu/onehealth/seminars/other/](http://www.epi.ufl.edu/onehealth/seminars/other/)

**Pop Microscopy** will launch the **Legacies of Leonardo: Celebrating 500 Years of Inquiry**, an interdisciplinary initiative by the University of Florida for the 500<sup>th</sup> anniversary of Leonardo Da Vinci's death.
